

# Desktop Manger will replace Landesk to install software and printers from the network

Moore County Schools IT

March, 2012

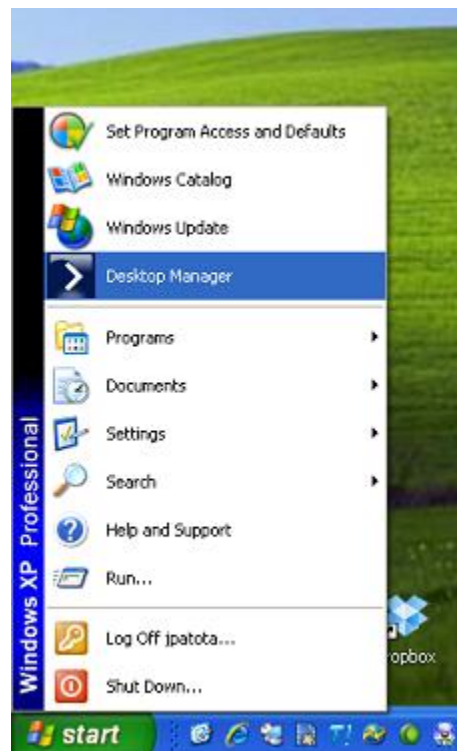

Landesk Software Deployment Portal has a new look and name, and has more features. The new version is called **Desktop Manger** and can still be used by teachers and students to download and install software and printers from the network to any computer in the network.

Desktop Manager began to appear on the Start Menus of computers in December of 2011 and will be fully deployed by the middle of June, 2012.

Here are the steps to use Desktop Manger:

1. Navigate to the Start Menu
2. Click on Desktop Manager
3. Select the software or printer you want to install
4. Click Deploy

You may close the Software Deployment Portal at any time after you click Deploy

Other Things To Know:

- Each column can be sorted. For example printers can be grouped together by clicking on the Group column header.
- Use the Refresh button get an updated list of software and printers
- Software and printers that were installed with the older version will not be shown as completed.
- The History tab can be used to show software that has been installed using this new version.
- The Status column also shows what has been install with the new version.
