

How to use LANDesk to install software and printers from the network

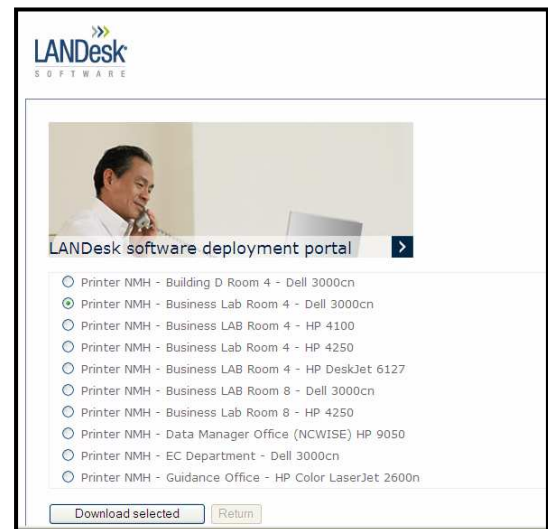

LANDesk can be used to download and install software and printers from our network to your computer. We call it the LANDesk Software Deployment Portal. It allows you to quickly and easily install the software and printers you need on any computer in your classroom.

These are the steps to download and install software using our LANDesk Software Deployment Portal:

1. Navigate to Start | Programs | LANDesk Management
2. Click on LANDesk software deployment portal

3. Adjust the window so that it fills up the entire screen by selecting the Maximize button from the upper right corner of the window.
4. Select the radio button for the software or printer you want to install

5. Click Download selected

The screen will show Installing.... and a progress bar at the bottom. When the software is installed the screen will show Install Complete

6. After the installation is complete you may close the LANDesk window
